RATINGS: 1 - Highly resistant; 3 - Moderately resistant; 5 - Intermediate; 7 - Moderately susceptible; 9 - Highly susceptible.

Blanks indicate insufficient information.

Hessian fly ratings are based on results of greenhouse tests with Kansas (Great Plains) biotype of Hessian fly.

Hessian fly populations are often a mixture of biotypes, thus results can vary among years and locations.

c indicates resistance has been inconsistent in greenhouse testing.

d indicates CLEARFIELD® variety, which is resistant to Beyond herbicide.

Maturity: 1 = Early; 5 = Medium; 9 = Late

Height: 1 = Short; 5 = Medium; 9 = Tall

Drought tolerance: 1 = Excellent; 5 = Good; 9 = Poor

Straw strength: 1 = Excellent; 5 = Good; 9 = Poor

Blanks indicate insufficient information.
